

## **QP Semi is Granted Full QML Certification**

**Santa Clara, Calif., September 16, 2003** – QP Semi today announced that it has received full Q level certification to MIL-PRF-38535, the performance specification used by the Department of Defense for monolithic integrated circuits. The Defense Supply Center Columbus (DSCC) granted full QML status that includes design, wafer fabrication, assembly, test, and QCI operations. QPSemi was initially granted transitional QML certification in 1998.

Achieving full QML status is another key milestone that demonstrates QP Semi's commitment to quality, reliability and the military marketplace.

QP Semi (formerly QP-Labs) is a full QML certified manufacturer and supplier of semiconductor components for high reliability applications. QP Semi specializes in supporting customers who are experiencing problems with the acquisition and processing of obsolete and end of life components.

Company headquarters are located at 2945 Oakmead Village Court, Santa Clara, CA 95051, USA; Telephone (408) 737-0992, FAX (408) 736-8708.
