

September 10, 2008

To Our Valued Customers,

We are pleased to announce that QP Semiconductor is in the process of being acquired by e2v Technologies plc, a publicly held company located in Chelmsford, United Kingdom. It is anticipated the acquisition will close on September 30, 2008, pending the approval by e2v shareholders and completion of regulatory requirements.

We look forward to the synergies that will come from our acquisition including expanded resources to provide better service, design and manufacturing capabilities for our customers. With e2v's backing, we anticipate achieving greater access to state-of-the-art design and manufacturing capabilities that will advance our manufacturing and re-engineering of very complex circuitry to new levels.

I am also pleased to note that QP Semiconductor will retain its product brand after we become a wholly owned subsidiary of e2v Technologies. We will also continue to operate from our Santa Clara, California factory with existing management and employees. All existing contracts and purchase orders will continue to be fulfilled seamlessly, without any changes.

If you have any questions or concerns, please don't hesitate to contact me directly or the QP Semiconductor representative nearest to you.

Sincerely,

A handwritten signature in black ink, appearing to read 'John Stannard'. The signature is fluid and cursive, with a long, sweeping underline that extends to the left.
